Introduction

Proflo Business Intelligence Solution P Ltd is a start – up, producers of software for the business processes, developing software platform that facilitate effective decision making and information flow across all domains.

Job Description

We are looking for programmers with a keen eye for design for the position of front-end developer. Front end developers are responsible for ensuring the alignment of web design and user experience requirements, optimizing web pages for maximum efficiency, and maintaining brand consistency across all web pages, among other duties.

Front end developers are required to work in teams alongside back-end developers, graphic designers, and user experience designers to ensure all elements of web creation are consistent. This requires excellent communication and interpersonal skills.

Role and Responsibilities

- Software development using modern programming languages
- Provide clear documentation
- Provide clear and concise communication
- Be a Team player
- Use advanced new technologies judiciously to reduce complexity
- Implement the identified components from High Level Specifications using the defined API standards.
- Make sure the developed components are unit tested
- Provide defect fixes
- Create documentation for the developed components
- Have the ability to understand and implement needed functionality with integration points between the middleware and back-end systems to handle the data mining and metrics needed to be able to collect and report KPIs.

- Must have experience working well on teams and utilizing GH and Agile concepts.

Required Technical and Professional Expertise

- 1+ Software Development experience using React or Angular Js, HTML/CSS/Javascript, Wordpress.
- Experience using Agile, GitHub, DBs, Web Technologies.
- The candidate will have the ability to understand the platform integration and work with the infrastructure team to deploy and drive the software live.
- There is an internal and external component to the software and the candidate must be able to understand the differences and plan/execute the changes for both.

Preferred Technical and Professional Expertise

- Must have experience working well on teams and utilizing GH and Agile concepts.
